Specifications

Stainless Steel Float Switch Bracket

SCOPE

This specification shall cover the minimum requirements for Stainless Steel Float Switch Brackets as manufactured by Steele Plastic Inc.

APPLICATION:

- INSTALATION OF FLOAT SWITCHES.

MATERIAL:

- 3/16" X 1-1/2" 304L stainless steel.
- 3/8" stainless steel bolts.
- 3/8" stainless steel nylock nuts.
- 3/8" stainless steel bar tight washers.
- LAPP 1/2" "Skintop"® strain relief cord connector.

DESIGN:

- The float switch bracket is designed to be installed inside the wet well and withstand any atmosphere commonly found in waste water sewage.
- Cord grip allows for secure adjustment of float switches.
- Available in 3, 4, and 6 switch designs.

As manufactured by Steele Plastics Inc., Conway Arkansas.
